AWNINGS/WALKWAY COVERS

THE TRUSTED NAME IN MANUFACTURING.

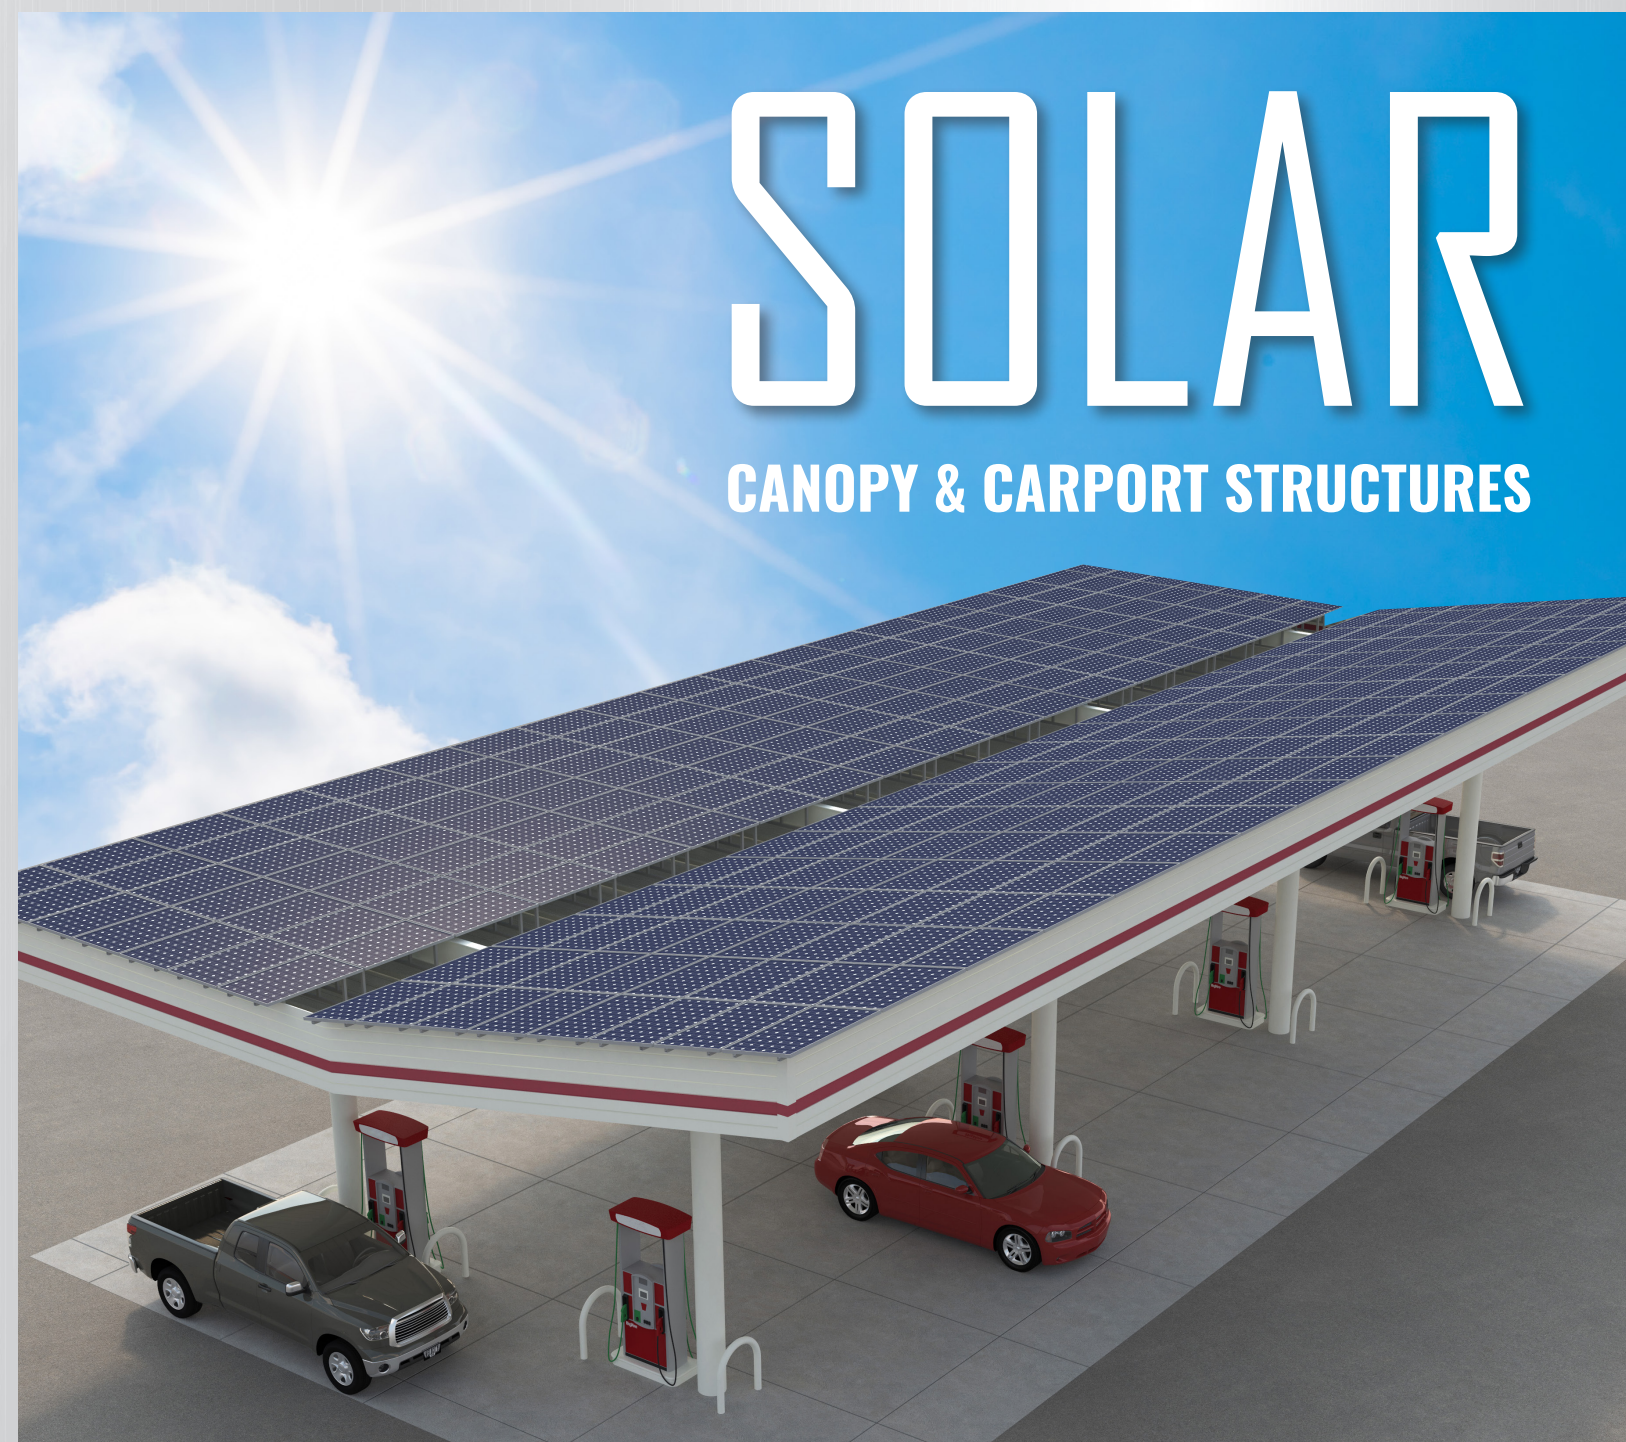

For over 35 years, our company has built a reputation as a nationwide leader in the design, fabrication and installation of premier canopy and fascia systems, kiosks, awnings, walk way covers and QSR elements at an affordable price, coupled with world-class customer service.

All of our components are prefabricated at our 55,000 sq ft manufacturing facility in Cassville, Missouri and shipped to your site via company operated carrier.

Arning is located in the Heartland of the USA; service and installation are available nationwide by our factory trained installation personnel.

Thousands of Arning canopies across America attest to our unrivaled excellence and commitment to quality. Thousands of customers can attest to our passion to exceed all expectations.

SOLAR

CANOPY & CARPORT STRUCTURES

Solar canopies are a great way to provide protection from the elements while generating electricity for your organization. Our robust, free standing canopies are constructed from steel and can be positioned to ensure maximum sun exposure to your solar panels.

Solar canopies are a great way to reduce your carbon footprint, and make great covered areas for walkways, waiting areas, bus stops, parking lots, dining areas, playgrounds and more. We work directly with your solar panel provider to design and engineer a canopy that fits your needs.

BENEFITS OF A SOLAR CANOPY

Installing a solar canopy on your property can have the following benefits:

- Pays for itself over time
- Lower or eliminate your electricity bills
- Excess electricity can be sold back to your electric company
- Tax incentives
- Reduce your carbon footprint
- Protect yourself from rising energy prices
- Increase property value
- Eco-friendly public perception
